Lyceum

Lyceum turns real job postings into a course decision with receipts, every semester, inside the tools lecturers already use.

Tualang, the host

WHO IT LANDS ON

She can suggest a change. She cannot show why.

Dr Aisyah, a fictional lecturer, is asked after class what her course should change before the next review. Her evidence sits in browser tabs and in memory.

WHY NOW

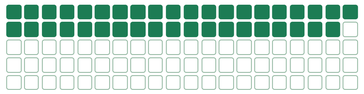

12 to 18 months

to approve a new degree programme, generally

39%

of workers' skills transformed or outdated, 2025 to 2030

Different measures of different populations, so never one chart.

World Economic Forum, Future of Jobs Report 2025; Wayne State and Texas Tech approval pages.

THE GIFT: A RECEIPT

An exact sentence, counted over a known denominator.

Stripe · Data Analyst, Intern · published 2026-10-01

> "You'll build metrics, scalable data pipelines, dashboards, and reports to inform and run the business."

1 of 9 reviewed postings

stripe.com/jobs/search?gh_jid=8194291 · retrieved 2026-10-09 · fnv1a-68604535-974

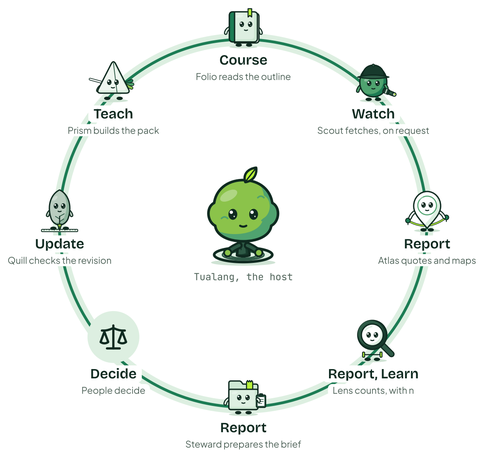

Exact excerpt from the source

experience with Python

That excerpt was not found in the saved source text. Quote it exactly; only spacing differences are tolerated.

A paraphrase, refused before it is stored. Nothing invented, nothing pasted.

THE PLAN: ONE LOOP, SIX STEPS, EVERY SEMESTER

Seven helpers do the work. People decide.

Lyceum: one core, many doors

System context and containers, Track A, 22 October 2026. Solid lines and tiles are built; dashed ones are planned.

Built · Built · Local, read-only
Planned · Planned · Links

PEOPLE

- Lecturer — runs the loop
- Coordinator — decides, adopts
- Programme committee — decides on briefs
- Students — via their results
- Quality office — reads the pack (planned)

work through the door they already use

DOORS

- Web workspace — React, in the browser — Built
- Claude, through the local door — MCP over stdio — Local, read-only
- ChatGPT Edu, Copilot Studio, Gemini Enterprise — MCP over HTTPS, OAuth — Planned
- Microsoft 365 Copilot and Teams — Agents Toolkit, Entra ID — Planned
- Canvas and Moodle — LTI 1.3, QTI 3.0 — Planned
- Word, Docs and Slides; a browser extension — Office.js, Docs APIs — Planned

reads and writes records in-browser store · read-only tools MCP, an exported workspace · the same tools, remote MCP over HTTPS, OAuth 2.0 · briefs as cards Adaptive Cards · launch, push a pack LTI 1.3 Deep Linking · save a brief or a pack Docs and Slides APIs

THE LYCEUM CORE

API and identity: one OpenAPI 3.1 core for every door, permissions on the server — Planned

THE DETERMINISTIC ENGINES

- Collector — permitted boards, on request
- Citation validator — exact substrings only
- Counter — Wilson 95% intervals
- Mapper — coverage ladder, targets
- Store and event log — validated backups, schema 5 — browser storage
- Constraint engine — hours, links, protected topics
- Brief composer — a receipt for every claim
- Pack renderer — editable PPTX, no model text
- Benchmark — a labelled scan set
- Skill folder — the loop for an assistant — Agent Skills, SKILL.md

fetch postings on request · HTTPS JSON APIs · tag a quotation · ESCO API · cite a baseline · links

SOURCES AND REFERENCES

Job boards with a documented public API
Greenhouse · Lever · Built · Ashby · Workable · SmartRecruiters · USAJOBS
and Adzuna, and schema.org JobPosting pages whose terms permit it: planned. Never LinkedIn, Indeed or Workday feeds.

Taxonomies — Planned
ESCO · O*NET · ISCO-08

Supply-side references — Links
CS2023, SFIA 9, NICE, CDIO 3.0, AACSB 2026
a baseline the outline can cite

results and surveys

INSTITUTION SYSTEMS

SIS · LMS gradebook · Survey tools · Quality office review calendar

Results and surveys filed as xlsx or csv: built. SIS and gradebook sync: planned.

Product names and logos belong to their owners and identify integrations; no partnership or endorsement is implied. Marks from Simple Icons, unmodified; text where a brand's terms ask for a licence (docs/brand-use.md).

WHAT IS REAL, AND WHAT IS NOT YET

TRL 6

Self-assessed against NASA ESTO's software column: "Prototype implementations of the software demonstrated on full-scale realistic problems."

185

automated checks passed on 22 October 2026, plus four headless browser runs.

PLANNED **Not built yet**

- Remote assistant doors
- The LMS door
- Learn's statistics
- The benchmark run
- Scheduled watching
- Shared workspace, sign-in

THE ASK

One department, one term, inside its LMS.

The pilot measures task completion, citation fidelity, time to a brief and repeat use.

Every semester adds a ring.

PLANNED

A QR code to the public landing page, once it is deployed

Lyceum, Universiti Teknologi PETRONAS. Dr Aisyah is fictional; the posting and the screens are real.

Every figure on this poster is in docs/claims.md, with its source.
